## Summary

## Business <br> Overview

Industry Leader in the Surfing Business

Growing Sports Apparel Industry Despite the Recession

Surfing Image as the Sales Driver for All Product Lines

- European sales up more than $25 \%$ for 2001 . With $36 \%$ of revenues coming from international markets, this bodes well for future growth prospects.
- Quiksilver will continue this international trend and will also continue to supplement this growth with respectable domestic sales figures. 2001 domestic sales were up $6 \%$.
- Costs are stable, and are not projected to increase, even given the aggressive branding campaigns that the Company utilizes.
- 5-year historical CAGR is $15 \%$, largely as a result of management's expertise at identifying and capitalizing on trends.
- Bookings (orders placed by retailers) are significantly up, reflecting the underlying trend in interests in board-riding sports. Quiksilver is currently the leading player in a growing niche, by virtue of its strong branding and awareness with boardsports enthusiasts.
- Further, our bullish projection has precedence as the Company has seen $\mathrm{P} / \mathrm{E}$ ratios above 23x.
- Quiksilver, Inc. was incorporated in Delaware in 1976. It designs, produces and distributes clothing and accessories with a casual style. It is the market leader in the surfing industry and its success is driven by its ability to identify and follow the core of boardsports.
- Consumer spending for active sports apparel exceeded $\$ 6$ billion in 2001. It is expected to grow in 2002, despite the recession, as some consumers move away from fashion-inspired purchases and opt instead for functional clothing with multiple purposes. ${ }^{1}$
- Industry-wide, boardsports represent $\$ 9.9$ billion in annual revenue, with roughly 80 percent of that coming from sales of related clothes, shoes and accessories. Though skateboarding counts as the dominant action sport in terms of the number of participants in it, boardsports are still driven by the image and influence of the surf lifestyle.

[^0]Being One of the Few Apparel Companies Successfully Tapping into the Growing Female Sports Apparel Markets

## Acquisition Focused in

- Quiksilver's product line includes shirts, walkshorts, t-shirts, fleece, pants, jackets, snowboard wear, footwear, hats, backpacks, sportswear, swimwear, etc. Watches and eyewear are produced by licensees. Its main customers are young men and young women (420 years old) with brands under Quiksilver, Roxy, Raisins, Radio Fiji, Hawk Clothing and Gotcha (Europe) labels. Snowboards, snowboard boots and bindings are under the Lib Technologies, Gnu, Supernatural Manufacturing and Bent Metal labels.

Indications of strength and growth in female boardsport market:

- Between 1997 and 2000, spending for women's sports apparel rose $20 \%$ to $\$ 15.86$ billion, while men's spending inched ahead by just $1 \%$, according to the Sporting Goods Manufacturers Association. ${ }^{2}$
- Women spend about $80 \%$ of all money that goes to sportswear and control $60 \%$ of the money spent for men's sports apparel. ${ }^{3}$
- In 1996, the nation's first all-female surfing school, Surf Divas of Encinitas, California was launched. In the same year, the first allwomen's surf shop, Watergirl, opened north of San Diego. (Outside Magazine) ${ }^{4}$
- 2002, October - The recent release of the Walt Disney Pictures animated hit "Lilo and Stitch" and the success of Universal Pictures "Blue Crush," a film about a group of female surfers, has created a groundswell of women who want to surf. ${ }^{5}$
- Females account for some 9 percent to 11 percent of the skateboard market, 22 percent to 25 percent of the snowboard market and 20 percent to 23 percent of the surf market. Quiksilver, Billabong and Rusty have successfully built junior labels for these customers. ${ }^{6}$

Acquisitions History -
1994 - The company acquired The Raisin Company, a swimwear

[^1]the Core Sportswear Industry

## Prices for Main Products

## Business <br> Divisions

Focused In-House
Design Force

Focused Promotion and Advertising

business.
1997 - The company acquired Mervin Manufacturing, a snowboard business.
2000 - The company acquired Hawk Designs, which owns the rights to use Tony Hawk, a skateboarding icon.
2000 - The company acquired Freestyle, S.A., the European licensee of the Gotcha trademark.
2000 - The company acquired John Ashworth, a startup business in golf apparel.
2001- The company acquired Quiksilver International, an Australian company that owns the worldwide trademark rights to the Quiksilver brand name other than in the United States and Mexico where those rights were already owned by the company.

Recent Business Development -
2002, September - The company signed a lease to open a companyowned Boardriders Club retail store in the middle of Times Square. The store is scheduled to open next April.
2002, September - The company acquired Beach Street, the operator of 26 Quiksilver outlet stores.
The domestic retail prices for its apparel products range from approximately $\$ 18$ for a t -shirt and $\$ 42$ to $\$ 47$ for a typical short to $\$ 200$ for a typical snowboard jacket. For its Quiksilver Europe products, retail prices range from approximately $\$ 26$ for a t -shirt and about $\$ 50$ for a typical short to $\$ 140$ for a typical snowboard jacket. As for snowboards, domestic retail prices range from approximately $\$ 250$ to $\$ 475$ and in Europe up to approximately $\$ 500 .^{7}$

The company designs the majority of its' products. Many of the company's managers, employees and independent sales representatives are involved in surfing, snowboarding, skateboarding and other sporting activities. They serve as product design consultants regarding the customer taste and market trend. Quiksilver's ability to take the pulse of its customer is part of its competitive advantage.

The company's history is in the sport of surfing and the beach culture, and its casual style is driven from a boardsports heritage. It has always maintained a strong marketing and advertising presence in the surfing world as well as other youth board riding marketplaces. The company's strategy is to continue to promote its core image associated with surfing and other board riding activities. ${ }^{8}$

[^2]
## Manufacture

## Competition

ZQK's main marketing activities include:

- Magazine advertisements and trade shows: Print images of high profile athletes in surfing, snowboarding, skateboarding and windsurfing;
- Holding surf, snowboard and skateboard contests in the markets where it distributes products. Locations include Hawaii, California, France, and Austria. ${ }^{9}$
- Co-branding arrangements with car producers and video games. For example, Peugeot and Toyota produce cars branded with Quiksilver and Roxy, and the Tony Hawk Pro Skater 3 video game is cross-promoted by both the company and Activision.

The company generally does not offer on-sale programs to its customers.

Over half of the company's domestic products are manufactured in the United States and the majority of its European products are manufactured in Asia. Goods are generally manufactured and processed on an order-by-order basis. During fiscal 2001, no contractor or finished goods supplier accounted for more than $6 \%$ of the company's consolidated production.

The market for beachwear, snowboardwear, skate apparel, casual sportswear and snowboards is fairly competitive. The main competitors include Billabong, Hurley, O'Neill and Volcom. In the department store and specialty store channels, the competitors include brands such as Tommy Hilfiger, Abercrombie and Fitch, Nautica and Calvin Klein. In Europe, the main competitors in the core market include O'Neill, Billabong, Rip Curl, Oxbow and Chimsee. In the snowboard wear and snowboard market, the Company's principal competitors are Burton, K-2 and Morrow.
Although there are several players trying to reach the young consumer with casual, lifestyle-oriented apparel, we feel that Quiksilver is uniquely positioned:

1) Quiksilver currently boasts the most impressive array of celebrity spokespeople in the sector. This lineup assures that the company will maintain its "real" image and continue to attract core customers. Celebrity pitch-people also assure that the company can fetch reasonable margins while fending off lower-quality knock-offs.

[^3]2) The company identifies and acquires small, well-situated competitors before they become large, and then parlays the location occupied by this company into another local presence for itself. By offering a wide variety of clothing and accessories that appeal to the same audience, Quiksilver avoids alienating the local customer base and thus expands its audience through a "guerilla acquisition" strategy.
3) Quiksilver's track record of being able to take the pulse of the boardsports enthusiast shows no sign of dissipating. If anything, the Company has demonstrated that it will become more and more popular as a brand, solidifying its position with loyal customers who are extremely brand- and imageconscious. As we see no reason for the boardsports arena to shrink in terms of spending or enthusiasm, we are confident that Quiksilver can maintain its position for many years to come. We believe that other analysts have taken a more pessimistic view of the company's prospects and have thus undervalued the equity.
4) A significant competitive response would require replicating the Quiksilver model. As the company has painstakingly assembled brands, locations and spokespeople over many years, we feel that dislodging it would require a sustained, multi-year effort by a committed player. We have not observed such an effort by a properly funded competitor thus far, although smaller but established players could certainly make inroads over time.

## Revenues

Overview

- Quiksilver's sales are generated within two major markets: The United States ( $61 \%$ of sales in 2002 YTD) and Europe ( $39 \%$ of sales in 2002 YTD). Their products are distributed through a variety of channels that include surf shops, Boardrider clubs, independent specialty stores and specialty chains, depending on the target demographic being served and the geographic location.
- Over $80 \%$ of domestic products are manufactured in the United States. The balance is imported. The majority of the Company's European products are manufactured in Asia. Sales are included as either domestic or European based on which division produced and shipped the product.
- The Company also generates revenues from royalties collected from licensing its brand name. However, this has historically constituted less than $1 \%$ of their gross revenues. Generally, licensees manufacture and distribute approved clothing, accessories and related products using the Quiksilver and Roxy trademarks. Licensed products include clothing, watches and

## Sales by Region

## Sales By Distribution Channel

eyewear.

- Overall, net Sales for the 9 months ending July 31 were $\$ 505,737,000$. This represented a $13.6 \%$ increase over the net sales for the comparable period in 2001. Domestic net sales for the same period increased $6.2 \%$ to $\$ 308,358,000$ from $\$ 290,477,000$ in 2000, and European net sales increased $27.5 \%$ to $\$ 197,379,000$ from $\$ 154,813,000$ for those same periods.
- The company's policy is to sell directly to retailers who merchandise their products in a manner consistent with the Company's image and the quality of its products.

| Region | Domestic | \% of Sales |  |
| :--- | :---: | :---: | :---: |
| Europe | Consolidated |  |  |
| US West Coast | 46 |  | 30 |
| US East Coast | 21 |  | 13 |
| Hawaii | 5 |  | 3 |
| Other US States | 18 | 46 | 11 |
| France |  | 32 | 17 |
| UK and Spain |  | 22 | 7 |
| Other European |  |  | 7 |
| Countries |  |  |  |
| Other International | 10 |  |  |
| Percentages of fiscal 2001 sales by geographic region (excluding licenses) |  |  |  |

- $46 \%$ of Domestic sales accrue from sales on the West coast. This is reflective of the huge surf and board sport adherents in the area.
- There is a strong effect of seasonality on the demand for certain products. Quiksilver counteracts this with a strategy of geographically diversifying its customer base.

| Distribution Channel | Domestic | Europe | Consolidated |
| :--- | :---: | :---: | :---: |
| Boardriders Clubs, surf shops, |  |  |  |
| and Quiksvilles | 24 | 39 | 30 |

| Domestic Exports | 10 |  | 7 |
| European Distributors |  | 9 | 3 |
| Total Division | 64 | 36 | 100 |

- Sales are spread over a large wholesale customer base. In 2001,

## Brand Acquisition

## Costs

[^4]approximately $22 \%$ of the Company's consolidated net sales were made to the Company's ten largest customers. No single customer accounted for more than $7 \%$ of the Company's consolidated net sales during the same period.

- A group of 210 independent sales representatives in the United States and Europe, and 61 distributors in Europe are responsible for selling the companies products. The Company's sales representatives are generally compensated on a commission basis.
- There is a strong movement by Quiksilver to build its network of concept stores (Quiksilver's selling space in the retail stores of selected customers). These are referred to as Quiksvilles. There were 203 additional Quiksvilles launched in 2001, representing an increase of almost $20 \%$ over the previous year's figures.
- The core of the company's sales is done through surf shops, Boardriders Clubs, and specialty stores where there is a Quiksville. Approximately $30 \%$ of the Company's sales were done through this channel of distribution in fiscal 2001. Most of these stores stand-alone or are part of small chains.
- Independent specialty or active lifestyle stores and specialty chains were responsible for $48 \%$ of the company's sales in 2001. This category includes chains such as Pacific Sunwear, Nordstrom, Duty Free Shops, and the Buckle, as well as many independent active lifestyle stores, snowboard shops and sports shops.
- The Company also sells its products to a limited number of department stores, including Macy's, Dillards, The Bon Marche and Burdines in the United States; and Harrods and Lillywhites in Great Britain. Sales to the department store channel totaled $12 \%$ of consolidated net sales in fiscal 2001. Approximately 3\% of the Company's business is done through distributors in certain European countries. 10
- In July of 2000, the company acquired Quiksilver International Pty Ltd. Consequently, the company now owns all international rights to use the Quiksilver trademark. This represents a huge potential market opportunity for the company.

## Summary

- In line with others Branded Apparel companies in our universe, Quiksilver also imports a significant percentage of its products from countries with cheaper labor, driving prices down, and
$\qquad$
enabling better margins.
- Management and snowboard production is kept in house.
- A few recent acquisitions in an attempt to vertically integrate will drive up costs, but will be more than offset by the gains in revenue from these acquisitions as reported above in the revenue section of this report.
- Following the recent trend, Royalty Revenue will be larger than Royalty Expense, and this surplus will continue to grow in the quarters to come.
- All of the above factors are already incorporated into the Quiksilver's stock price. What remains speculative, however, are its recent Times Square store purchase and the 26 outlet stores purchases. Due to the decrease in retail spending, the current stock price reflects a poorer than average performance for this store. Our outlook on this store, however, is bullish. Inline with ZQK's store performance all over the country, the Times Square Store will generate in excess of $\$ 1000$ per square foot, raising revenue by over $\$ 3 \mathrm{M}$ by this time next year. The Outlet Stores will also add to revenue.
- Adding to our bullish outlook, we further believe that Branding will remain extremely strong. While this costs the Company 5\% of sales, the consumer marketplace is highly responsive to this and will remain so for our investment horizon.

## Production and Raw Materials

In-House Expertise

## Buyer Power

- For fiscal year ended 2001, $53 \%$ of apparel products were manufactured by domestic contractors from raw material provided by QuikSilver. $89 \%$ of raw materials provided to the domestic contractors were made in the United States. No single fabric supplier accounted for more than approximately $8 \%$ of the Company's consolidated expenditures for raw material purchases. There are no long-term relationships with suppliers.
- $47 \%$ of apparel products were imported as finished goods from foreign countries: primarily from China, Vietnam, North Africa and Portugal.
- The Company manufactured all of its snowboards in companyowned factories in the United States.
- At the end of fiscal 1997, the Company acquired certain assets from two domestic cutting contractors. Since then, all cutting for the domestic subcontractors has been done in-house.
- Quality control is also kept in-house.
- During fiscal 2001, no single contractor accounted for more than $6 \%$ of the Company's consolidated production. The Company reports that numerous qualified contractors are available in the

## Employees

## Unions

## Trade Quotas

## Properties \& Stores

short run to provide additional capacity, should this be needed.

- The Company reports that it employs approximately 1,950 persons, including approximately 1,180 in production, operations and shipping functions, approximately 730 in sales, administrative or clerical capacities, and approximately 40 in executive capacities.
- None of the Company's domestic employees are represented by a union, and less than $10 \%$ of its European employees are represented by a union. The Company has never experienced a work stoppage and considers its working relationships with its employees to be good.
- The Company imports finished goods and raw materials under multilateral and bilateral trade agreements between the United States and a number of foreign countries, including Hong Kong, India, China and Japan. These agreements impose quotas on the amount and type of textile and apparel products that can be imported into the United States from the affected countries. The Company does not anticipate that these restrictions will materially or adversely affect its operations since it would be able to meet its needs domestically or from countries not affected by the restrictions on an annual basis.
- Quiksilver Europe operates in the European Union, within which there are few trade barriers. Quiksilver Europe also sells to six other countries belonging to a trade union, which has some restrictions on imports of textile products and their sources. The Company does not anticipate that these restrictions will materially or adversely impact its operations since it has always operated under such constraints and the trend in Europe is continuing toward unification.
- The Company's executive offices, merchandising and design, production and warehouse facilities occupy multiple buildings located in Huntington Beach, California, France, and two facilities in the state of Washington. The Company also maintains a sales office in New York and an Australian office in Avalon, New South Wales. The aggregate monthly rental payment for rented facilities is approximately $\$ 900,000$. The Company believes that its present facilities will be adequate for its immediately foreseeable business needs.
- As mentioned in the revenue section of this report, the Company also own retail space for direct sales through it "Boardriders Club" Stores. In late September, QuikSilver announced the purchase of a store in the heart of Times Square, Manhattan, estimated to be the highest customer foot traffic in the world. In accordance with its Champs-Elysees stores in France which
produce in excess of $\$ 1000$ per square foot, the Times Square store should also do the same and would be very profitable at this level. The new store will be 3,000 square feet.
- With the purchase of "Beech Street," the past owner-operator of the QuikSilver Outlet Stores, in 2002 for $\$ 7.5 \mathrm{M}$ QuikSilver will own the entire distribution channel of 26 outlet stores.

Source: CIBC World Markets Corp. and company data

Royalties

## Interest and Tax

- The Company has historically received royalties from its watch, sunglass, Mexican and outlet store licensees. These licensees do business in many countries and territories around the world, with headquarters in Australia, Japan, Turkey, South Africa, Brazil, Indonesia, South Korea, Argentina, Chile and Mauritius. As a result, royalty income totaled $\$ 5,169,000$ in fiscal 2001, up from the fiscal 2000 figure of $\$ 3,681,000$.
- Much of this income, however, was offset by the royalty expense. In fiscal 2001, Royalty income exceeded royalty expense by $\$ 232,000$, but the opposite was true in the previous year when royalty expense exceeded royalty income by $\$ 3,143,000$. This improvement resulted from the Quiksilver International acquisition.
- Interest expense in fiscal 2001 increased $69.0 \%$ to $\$ 10,873,000$ from $\$ 6,435,000$ in the previous year. Of that increase,

## Expense

Leaving others in the surf, branding is $5 \%$ of sales
approximately $\$ 2,200,000$ was related to debt resulting from the Quiksilver International acquisition. The rest of the increase came primarily from additional borrowings to provide working capital to support the Company's growth and to continued investments in retail stores.

- The Company's income tax rate for fiscal 2001 decreased to $38.3 \%$ from $38.6 \%$ in fiscal 2000. This reduction resulted primarily because a higher percentage of the Company's profits were generated in countries with lower tax rates.
- Branding and Advertising play a critical role in the Company's success, enabling a pricing premium and sales growth. The brand is built around a strategy of promoting its core image of surfing and other boardriding activities. The Company advertises in magazines such as Maxim, Surfer, Surfing, Skateboard and Transworld Snowboarding in the United States and Wind, Snowboard and Surf Session in Europe. The ad campaign also includes national publications in the United States, such as Spin, Seventeen and Teen People, and mainstream publications in various European countries such as L'Equipe, GQ, Viajes N.G. and Focus.
- The Company also participates in trade shows, which are held throughout the United States and Europe.
- In addition to print media, the Company's core marketing includes surf, snowboard and skateboard contests in the markets where it distributes product. The Company also sponsors an international team of prominent athletes to produce promotional movies and videos featuring athletes wearing and/or using Quiksilver products.
- Co-branding arrangements with independent companies are also used to promote the Company's brands. For example, Peugeot and Toyota produce cars branded with Quiksilver and Roxy, and the Tony Hawk Pro Skater 3 video game is cross-promoted by both the Company and Activision.
- Because of the better than expected results and the strength of the fall and holiday product assortment, Quiksilver increased its domestic advertising spending for the second half of the year (announced on the second-quarter conference call) by $\$ 1.5$ million, to be spent on a national magazine print campaign for Quiksilver.
- Management reports that Quiksilver will continue to get more aggressive in its domestic marketing, with ads in national magazines. We believe this will enhance the visibility of the brand.
- Advertising as a percentage of sales will be $5 \%$ at the end of
$\qquad$

Valuation

## Comparables

2002. 

We evaluated Quiksilver's equity value using two methods:

1) Comparable Companies
2) Discounted Cash Flows Available to Equity Holders

- Quiksilver seems pricey with respect to earnings, but very much in line when considering cash flows.
- As a fast grower, we would expect Quiksilver to fetch a higher multiple to earnings than its slower growing counterparts in our coverage universe.
- Our target price of $\$ 31$ is only 18 times consensus 2003 earnings estimates of $\$ 1.75 /$ share, which we think is cheap given the near-term growth potential of the company.

| Company | Price/ <br> Earnings | Price/ <br> Book | Price/ <br> Sales (ttm) | Price/ <br> Cash Flow (ttm) |
| :--- | :---: | :---: | :---: | :---: |
| Quiksilver | 22 | 2.3 | 0.9 | 13.8 |
| Coverage Universe Median | 15 | 2.3 | 0.9 | 13.3 |
| Columbia Sporstwear | 17.5 | 3.7 | 2.0 | 16.6 |
| Liz Claiborne | 15 | 2.7 | 0.9 | 10.2 |
| Jones Apparel Group | 15 | 1.9 | 1.1 | 13.3 |
| Polo Ralph Lauren | 14 | 2.0 | 0.9 | 9.3 |
| Tommy Hilfiger | 5 | 0.6 | 0.4 | 2.8 |
| VF Corporation | 24 | 2.4 | 0.8 | 24.0 |
| Source: Multex, Marketguide |  |  |  |  |

## Discounted Cash Flow

## WACC

- We discounted Cash Flows using the WACC. Net Debt as a percentage of Firm Value has remained relatively constant over the past few years, so the WACC approach appears reasonable.
- A range of market risk premiums was used to generate multiple WACCs in order to simulate varying assumptions/preferences used by investors in the market.

| Assumptions for WACC $/ \mathrm{DCF}$ |  |
| ---: | :--- |
| Beta | $=1.12$ |
| Mkt. Value Equity | $=569,000,000$ |
| Equity Proportion | $=88 \%$ |
| Mkt. Value of Debt | $=74,564,740$ |
| Debt Proportion | $=12 \%$ |
| Firm Value | $=643,564,740$ |
| Avg. Cost of Debt | $=8 \%$ |
| Shares Outstanding | $=24,365,000$ |

Equity Value Per Share

- By discounting firm values using the range of WACCs and subtracting the value of debt, we produced an array of possible equity values.
- In the table below, we averaged the equity values for each of our growth scenarios (Worst, Best, Base) and also averaged the column values across all of the cases for different terminal growth rates.
- We see that the Base case returns an equity value that is better than $20 \%$ higher than the current stock price, and the Worst case is less than $20 \%$ off the current stock price.
- The column result for terminal growth equaling $4 \%$, which is the long-run growth rate for the sector, returns a value that is also better than $20 \%$ higher than the current stock price. We think the market may not have properly taken into account the sustainable upside potential of Quiksilver, and thus we feel that the aggressive terminal growth rate is warranted.
- We arrived at a target price of $\$ 31$ for the stock, which is more than $20 \%$ higher than the current trading price.
- We have included detailed assumptions about how free cash flows to the firm were derived later in the report.

NPV of Discounted Cash Flows to Equity given Growth Assumptions and WACC
Terminal Growth Rate

| Case | WACC | $\mathbf{2 \%}$ | $\mathbf{3 \%}$ | $\mathbf{4 \%}$ | $\mathbf{5 \%}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Worst | $13.5 \%$ | 12.20 | 13.81 | 15.76 | $\mathrm{~N} / \mathrm{A}$ |
| Avg. 20.38 | $12.5 \%$ | 13.63 | 15.56 | 17.94 | $\mathrm{~N} / \mathrm{A}$ |
|  | $11.5 \%$ | 15.36 | 17.72 | 20.70 | $\mathrm{~N} / \mathrm{A}$ |
|  | $10.6 \%$ | 17.49 | 20.44 | 24.29 | $\mathrm{~N} / \mathrm{A}$ |
|  | $9.6 \%$ | 20.18 | 23.99 | 29.16 | $\mathrm{~N} / \mathrm{A}$ |
|  | $8.6 \%$ | 23.69 | 28.79 | 36.14 | $\mathrm{~N} / \mathrm{A}$ |
| Best | $13.5 \%$ | 19.97 | 21.99 | 24.42 | 27.43 |
| Avg. 33.39 | $12.5 \%$ | 21.89 | 24.30 | 27.27 | 31.04 |
|  | $11.5 \%$ | 24.18 | 27.12 | 30.84 | 35.70 |
|  | $10.6 \%$ | 26.97 | 30.65 | 35.46 | 41.99 |
|  | $9.6 \%$ | 30.47 | 35.22 | 41.68 | 50.96 |
|  | $8.6 \%$ | 34.99 | 41.37 | 50.53 | 64.83 |
| Base | $13.5 \%$ | 18.85 | 20.72 | 22.98 | 25.77 |
| Avg. 31.34 | $12.5 \%$ | 20.64 | 22.88 | 25.64 | 29.13 |
|  | $11.5 \%$ | 22.78 | 25.51 | 28.97 | 33.48 |
|  | $10.6 \%$ | 25.39 | 28.81 | 33.27 | 39.33 |
|  | $9.6 \%$ | 28.65 | 33.06 | 39.05 | 47.67 |
|  | $8.6 \%$ | 32.86 | $\mathbf{2 2 . 7 9}$ | $\mathbf{2 6 . 1 5}$ | 60.56 |

## Calculation of Free Cash Flow to the Firm Over a Five-Year Horizon

Assumptions:

- Each free cash flow case (Base, Best, Worst) refers to Pro Forma calculations of Net Income, which are each included in subsequent tables.
- CAPEX ramps down from current level of $4 \%$ of sales to $3 \%$ of sales over the 5-year horizon. As the company achieves density in its target markets, we believe less investment will be required in PP\&E. International growth will come more slowly than in the U.S.
- Working Capital levels remain constant at $25 \%$ of sales. This is a conservative assumption as the company will likely become more efficient with operations as it matures.

| BASE CASE | Y 1 | Y 2 | Y 3 | Y 4 | Y |
| :--- | ---: | ---: | ---: | ---: | ---: |
| NET INCOME | 47,250 | 51,975 | 54,573 | 56,756 | 58,459 |
| POST TAX INT | 6,092 | 6,701 | 7,036 | 7,318 | 7,537 |
| NOPAT | 53,342 | 58,676 | 61,609 | 64,074 | 65,996 |

## Pro Forma Income Statements Over a Five-Year Horizon

Assumptions:

- We assume that expenses will remain constant as a percentage of sales. Common size expense levels can be found in the subsequent income statement table under the column for current fiscal year (ending 10/31/2002).
- For the Base and Best Cases, we assume that sales will continue to grow at the 5-year CAGR of $15 \%$ in the first year, and then growth rates will decline towards the long-term range.
- In the Worst Case, sales in the upcoming year do not reach the 5 -year CAGR of $15 \%$, and sales then taper off towards the long-term range. See the Sales Growth Factor in the bottom row for each case.
