Kmart & Sears: Wal-Mart Ate My Lunch...

Sears Holding Corp. (\$104.99)

Target Price: \$91

Rating: Underweight

An over-valued turnaround store with limited potential for success:

| | |
|-----------------------|---------------------|
| Current Market Price: | \$ 104.99 |
| 52 Wk Range | \$ 22.41 - \$106.30 |
| Market Cap | \$ 9.36 bn |
| Trailing P/E | 9.78 |
| Forward P/E | 16.38 |
| Return on Assets | 16.45 |
| Return on Equity | 45.84 |

| | |
|-----------------------|--------------------|
| Current Market Price: | \$ 52.95 |
| 52 Wk Range | \$ 31.21 - \$56.06 |
| Market Cap | \$ 11.01 bn |
| Trailing P/E | 4.97 |
| Forward P/E | 24.2 |
| Return on Assets | 9.59 |
| Return on Equity | 47.43 |

We are underweight Sears Holding Corp.'s equity (the name given to the \$11bn combination of Kmart Holding Corp. and Sears Roebuck & Co). When we first started writing our report on Kmart two weeks ago, we were bearish Kmart at its trading levels given the tough operating environment for retailers in general, and the growing margin pressure from Wal-Mart. On a stand-alone basis, we would also have been underweight Sears Roebuck. On November 17, Kmart and Sears made a surprise announcement that the two companies planned on merging. Under the terms of the deal, Kmart shareholders will receive one share of Sears Holding for each of their shares. Sears investors will receive 0.5 shares of the new company (or \$50 in cash) for each of their shares. The \$50 price represents a 10.6% premium over Sears' closing share price on November 16.

Company Description: Kmart Corporation is a discount retailer operating through 1,511 Kmart discount stores and Supercenters with locations in 49 states, Puerto Rico, the United States Virgin Islands and Guam, as of January 28, 2004, and through an e-commerce shopping site, www.kmart.com. The Company has one operating segment that consists of its retail business. Its general merchandise retail operations are located in 286 of the 331 metropolitan statistical areas in the United States. Its 60 Kmart Supercenters combine a full grocery, deli and bakery, along with the general merchandise selection of a Kmart discount store. The brands that the Company markets include Martha Stewart Everyday, Joe Boxer, Jaclyn Smith, Sesame Street and Thalia Sodi, among others. On January 22, 2002, Kmart and 37 of its United States subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code. In May 2003, the Company emerged from Chapter 11 protection. (Source: Yahoo Finance)

Company Description: Sears, Roebuck and Co. is a multi-line retailer that offers an array of merchandise and related services. The Company operates principally in the United States, Puerto Rico and Canada. During the fiscal year ended January 3, 2004 (fiscal 2003), Sears was organized into three domestic segments: Retail and Related Services, Credit and Financial Products and Corporate and Other; and one international segment: Sears Canada. The Retail and Related Services segment consists of merchandise sales and related services, including service contracts, delivery and product installation and repair services. The Credit and Financial Products segment managed the Company's domestic portfolio of Sears Card and MasterCard receivables. This business was sold on November 3, 2003. The Corporate and Other segment includes the operations of Sears Home Improvement Services. The Sears Canada segment includes similar retail, credit and corporate operations conducted by Sears Canada, a 54.4%-owned subsidiary. (Source: Yahoo Finance)

Equity Research

I. Overview

... Institutional ownership is preponderant, signaling the firms' value as stable retail holdings.

Combining two struggling retailers with dismal sales does not necessarily produce a winner ...

Insider ownership is significant for Kmart, not surprising given ESL's huge stake and the company's restructuring history. Insider ownership is negligible, however, for Sears. Institutional ownership is preponderant for both companies, signaling the firms' value as stable retail holdings. For the purpose of writing this report, we will assume that the merger deal will work out, although we want to draw attention to the possibility, however remote, that another bidder (such as Vornado Realty Trust) might try to stir the pot by topping Kmart's bid.

Eddie Lampert (of ESL Investments and chairman of Kmart) will run the combined group along with Aylwin Lewis (recently appointed chief executive of Kmart) and Alan Lacy (chief executive of Sears). Sears Holding, which will be the third-largest US retailer after Wal-Mart and Home Depot, will be headquartered in Hoffman Estates, Illinois, at Sears' current home-base. Investors sent the stocks of both companies soaring upon news of the merger plan. Sears Holding, with \$55bn in annual revenues still lags far behind Wal-Mart Stores, with \$280bn in annual revenues.¹

Combining two struggling retailers with dismal sales does not necessarily produce a winner; the aphorism of "two wrongs do not add up to a right" comes to mind. Speculation is rife that Lampert wants to turn the combined entity into a Berkshire Hathaway-like investment vehicle.² When investors buy Sears Holding's equity, investors are not really investing in the combined retailer as much as they are investing in Eddie Lampert's business acumen. If one thinks that Lampert is the second coming of Warren Buffett, then buying the stock at current valuation levels makes sense. Eddie is a great trader, no doubt, but he has yet to earn his spurs as the honcho of a major going concern. Our view is that for an investor looking for stable returns, the risk of owning Sears Holding's equity is not worth it.

In the long-run, we see Eddie consolidating Sears Holding, divesting underperforming stores, accruing tax-shielded cash from the retail operations using \$3.8bn in deferred tax assets,³ and eventually spinning

Equity Research

off the going concern to a strategic player like Target or the European retailing giant Carrefour.⁴

In a sign that the fixed-income market is not pleased with the merger, S&P warned that the company could end up with a junk rating when the deal is finalized. Moody's has lowered its rating on Sears' debt to a low investment grade ranking of Baa2. Credit default swap spreads on Sears widened some 20 basis points on the announcement.⁵

II. Background

Many investors are confused about why Lampert would engineer such a takeover for cash-rich Kmart, which could have had its pick of investment opportunities. Eddie is often referred to as the next Warren Buffett,⁶ whose successful investment technique of buying solid, dull, and undervalued companies is one that the 42 year-old Lampert has closely followed. Lampert bought his initial stake in AutoZone Inc., the struggling auto-parts retailer, in 1997. By 1999, Eddie had a seat on AutoZone's board and eventually brought in a new management team and boosted cash flow. The result was improved earnings and a fourfold surge in the company's stock price.⁷

**... why...engineer
such a takeover for
cash-rich Kmart,
which could have had
its pick of investment
opportunities?**

Eddie brought Kmart out of Chapter 11 bankruptcy proceedings on May 6, 2003 with its long-term prime leases intact. Kmart had filed voluntary petitions for reorganization under Chapter 11 of the US Bankruptcy Code on January 22, 2002; the company was forced into bankruptcy mainly by fierce competition from Wal-Mart. Kmart's bankruptcy restructuring was an all equity deal. The equity stake was wiped out and all of the debt outstanding was converted to new equity in the restructured entity; nothing would have been left over for the creditors had the deal not been an all-equity transaction.⁸

Eddie led an aggressive strategy of closing or selling about 600 stores. This aggressive cost-cutting and asset divestiture strategy has been the main driver of Kmart's speedy financial turnaround. Since coming out of bankruptcy, Kmart's stock has more than quadrupled in value. Before the merger announcement, the consensus estimate was for Kmart shares to hit \$110/share by the end of the year, which happened shortly after the merger news hit the tape.⁹

Equity Research

Kmart has not been plowing its cash flow back into its operations and thus has not been able to sustain any substantial growth on an operational basis. Kmart's inventories and fixed assets are in bad shape and subject to shrinkage.¹⁰ Kmart's earnings to date have benefited from deferred tax assets that came from writing down assets before the bankruptcy and taking the losses through the process. Aside from this limited source of capital, there is not a lot of potential upside in the Kmart story.

III. Issues and Concerns

At Kmart, customers' household incomes are typically \$25,000 and below. Kmart was the first discounter to use exclusive brands. Over the past few years, the company's stable of exclusive brands has expanded to include Jaclyn Smith, Sesame Street, Kathy Ireland, Martha Stewart Everyday, and most recently, Joe Boxer. The latter two lines have been wins for the retailer, as both have raised the profile of its stores and attracted new customers.¹¹ With the merger, there will be difficulties in synchronizing Kmart and Sears with regards to merchandising and planning. There are no guarantees that cross-selling between the stores (i.e. bringing Craftsman tools into Kmart or Martha Stewart-branded goods into Sears) will drive business.¹²

We view competition [from Wal-Mart and Target], however, as an unavoidable part of doing business in the retail space.

Lampert, Lewis and Lacy plan on squeezing suppliers as the combined Sears Holding entity buys \$40bn a year in merchandise. Sears Holding also plans on lowering costs by streamlining its back-office operations. The new company is expected to have annual savings, or "synergies," of \$500 million over the next three years. Whether these ambitious goals can be achieved remains to be seen.¹³

Aylwin Lewis, formerly of Yum! Brands, has extensive experience in the restaurant business although he has no prior experience with retail.¹⁴ Aylwin's expertise might not translate over to running Sears Holding Corp, especially in the face of unrelenting competition from Target and Wal-Mart. Aylwin's strong operations background, however, could help Sears Holding focus on cutting costs and overlapping functions between Kmart and Sears stores.¹⁵

Equity Research

The potential for Sears to improve sales by expanding into some of the stand-alone or off-mall locations occupied by Kmart is substantial.

Sears Holding is purportedly not going to compete head-to-head with Wal-Mart and Target. We view this competition, however, as an unavoidable part of doing business in the retail space. Kmart and Sears have to generate more consumer traffic; the stock will drop if they do not. Christmas sales will be crucial in determining Sears Holding's value as a going concern.¹⁶ An increased focus on branded goods will help generate more traffic.

Sears' sales have remained weak. Comps were down 4% in the domestic business and the company experienced particularly weak demand in August and September due in part to unseasonably cool weather. Further markdowns were needed in apparel to clear seasonal slower moving inventory.¹⁷

Selling off underperforming real estate and tucking away retained earnings appear to be Lampert's main source of free capital. Kmart's leases constitute the bulk of Kmart's value as same-store sales and other retail metrics have been declining steadily. Eddie had sold 45 stores to Sears for \$524.5 million and a further 18 stores to Home Depot for \$271 million before the merger announcement.¹⁸

Geographically, Kmart stores are concentrated in urban areas with a heavy African-American and Hispanic presence. Sears stores are also located primarily in urban areas, and so growth prospects will be limited. According to UBS retail analyst Gary Balter, 64% of Sears' full-line stores are within one mile of a Kmart store, and 68% of Target and Wal-Mart stores are within one mile of a Kmart or Sears' store. Kmart and Sears' overlap could lead to some cannibalization and possible brand deterioration.¹⁹

The potential for Sears to improve sales by expanding into some of the stand-alone or off-mall locations occupied by Kmart is substantial. Talking about Sears, Alan Lacy declared that "Off-mall growth is our number one strategic position... We have an opportunity to significantly accelerate" that strategy. Eddie Lampert believes that converting some Kmart stores into Sears' stores would boost sales among suburban shoppers who bypass Kmart for Wal-Mart and Target. There are over 1,500 Kmart stores in off-mall locations in high traffic areas. Sears' strategy to move off-mall highlights a trend that some mall-based retailers are starting to adopt in order to stay competitive. Sears had already started moving in this direction prior to the merger

Equity Research

... we certainly see a transformation of Sears Holding into an investment vehicle as a likely strategy, which would not necessarily be good news for investors ...

announcement with the build-out of a few Sears Grand stores. Sears' desire to move off-mall, where many Kmart properties are, was most likely one of the main driving forces behind the merger.²⁰

At its stores inside malls, Sears, not unlike JC Penney, has been losing traffic to more exclusive boutiques and branded stores. By moving toward having more stand-alone stores, Sears could boost its product offerings and benefit from reduced competition. According to Darrell Rigby, head of the global retail practice at Bain & Company, a growing segment of consumers is less interested in going to malls. Mall traffic has been declining steadily as more people shop off the mall. One of the reasons is that malls are less convenient than big-box stores where customers can park closer to the entrance. Mr. Rigby continued "As Sears has built off-mall stores they have found it is not cannibalizing their existing stores nearly as much as they expected...it is a different customer base who go there for different purchasing occasions; they are going there more frequently because of the mix of merchandise."²¹

Looking at Kmart's cash position, we certainly see a transformation of Sears Holding into an investment vehicle as a likely strategy, which would not necessarily be good news for investors looking to buy retail stock. In the event that Eddie Lampert elects not to pursue this course, there has not been a lot of clarity on exit strategies for his investment. Lampert's role in the merger is fueling speculation about how the merged company will unlock value in its real-estate holdings. Estimates of Sears' real estate value remain a little exaggerated. It is very likely that groups of underperforming stores (both Sears' and Kmart's) will likely be sold to fund off mall expansion for Sears Holding and to build a mountain of cash for Lampert's investment vehicle.

Kmart and Sears' corporate cultures will have to be merged, posing additional challenges for the combined retailer. Sears, founded in 1886, is one of America's most well-established shopping institutions. Although its products are often discounted, the retailer is not a pure discounter like Wal-Mart, Target or Kmart. Sears puts a premium on customer service and its staff having very high levels of product knowledge whereas service does not play as big a role at Kmart. The emphasis at Kmart is on a convenient shopping experience as opposed to product knowledge. Over the past year, Kmart has been trying to sell more branded products, while Sears has been adding more soft goods to its stores, which will help make the cultural fusion a little easier.²²

Equity Research

At some point, however, it is likely that Lampert will look for a buyer for the going concern.

... do not...discount the legacy/ego effect; Lampert can...earn his rightful place in the pantheon of ...business legends if he can cobble together a success story out of two relative failures.

Regarding inventory, Kmart and Sears have not made any moves toward matching Wal-Mart's steady progression toward scan-based trading (using checkout scan technology to pressure manufacturers to own each product until it is sold, therefore shedding billions of dollars worth of inventory from the balance sheet).²³ This will further put Sears Holding at a disadvantage vis-à-vis Wal-Mart.

Eddie Lampert will likely use Sears Holding as an investment vehicle. Kmart is currently sitting on \$4 billion of cash and not much of it has been dedicated to retail. It is likely that Lampert will use Sears Holding to generate even more cash. Lampert might buy Toys 'R Us (or their Babies 'R Us unit) to add to his real estate portfolio and enhance Sears Holding's scale and value as a going concern.²⁴

At some point, however, it is likely that Lampert will look for a buyer for the going concern. Target or Carrefour could be potential strategic buyers of Sears Holding's retail business. Vornado would be a likely buyer of Sears Holding's divested real-estate properties. Retail is a terrible industry to be in, mainly because the industry is very badly financed. Between 1978 and 1992, an inordinate number of retailers went insolvent and had to reorganize. For every Wal-Mart, there was a Federated Department Stores or an Ames. Moreover, the Wal-Mart phenomenon has caused all kinds of permanent revolutions in the retail space making it harder to compete.²⁵ Owning retailers only makes sense, from an investment vehicle's standpoint, in order to build a tremendous cash surplus.

In terms of retail, cash-rich specialty retailers which cater to a niche, such as Sharper Image, appear to be well-positioned to tough it out for a while longer. And so, we would not be altogether surprised if Lampert decided to transform Sears Holding into a niche player in retail, focusing on branded appliance goods, apparel brands, and catalogue sales instead of simply providing all sorts of goods at a lower price than the next retailer.

We do not want to discount the legacy/ego effect; Lampert can truly earn his rightful place in the pantheon of great American business legends if he can cobble together a success story out of two relative failures.

Equity Research

IV. Valuation

Using an APV (adjusted present value) discounted cash flow model and using Kmart's share price as a proxy for Sears Holding Corp.'s share price, we arrive at a theoretical share price of \$91.08 for Sears Holding Corp. The theoretical price is well below the \$104.99 price level that the surviving Sears Holding Corp.'s equity is currently trading at (we use Kmart's price in this analysis since it will be the surviving entity, even if it will not retain its name).²⁶

Our analysis of the firm's comparables from a multiples perspective further supports our view that the share price is currently overvalued. On a comparables basis, we regard Sears Holding Corp. as fairly valued at best. As an aggregated entity, Sears Holding Corporation trades more like a mall retailer than a free-standing growth retailer. Traditional department stores trade in the 6-8x FV/EBITDA range, whereas "off-the-mall" retailers trade in the 10-12x range. Sears Holding falls firmly in the department store camp with a 7x range. Despite Sears' concerted efforts to move away from its historic role as primarily a mall anchor-store and the inclusion of Kmart's predominantly free-standing locations to the combined company's empire, we feel that the successor company does not yet justify the same multiple as successful "off-the-mall" retailers like Wal-Mart, Best Buy, and Home Depot.

... the break-up value of the combined entity's real assets [are] about \$70 per-share, well below the current trading value.

Looking at the results, Sears and Kmart, as stand-alone entities, appear to be reasonably priced on a Price-to-Earnings basis. Incorporating growth into the analysis, however, paints a different picture. Looking at the firms' PEG ratios, Kmart and Sears both appear to be materially more expensive than discount retailers Target and Wal-Mart, and again are trading much closer to department stores like May and Saks. Kmart's PEG ratio of 1.81 and Sears' ratio of 5.82 dwarf Target's 1.33 and Wal-Mart's 1.45.

We ran a "sum-of-the-parts" analysis (please refer to page 26) where we looked at the break-up value of the combined entity's real assets and found it to be worth about \$70 per-share, well below the firm's current trading value. The market clearly attaches a premium to the firm's value as a going concern. We also ran a base case scenario for the combined entity (please refer to pages 23-25), stripping away the effects of any promised synergies stemming from the merger. The result of the base-case analysis is an APV value of \$81.23.

Equity Research

On a technical basis, our total APV valuation of \$91.08 falls into line with our technical analysis of the firm's share price. There appears to be an upper resistance level in the mid-to-high 90's and we doubt that the company will stay above it for long, although it has been trading well above that level with the frenzied merger rally. Once the euphoria fizzles out, we see Sears Holding Corp.'s share price (represented by Kmart's share price) settling back down into the low 90's range.

We are underweight Sears Holding Corp. at current trading levels and would switch to an overweight position only if the share price dips below \$88/share, which is unlikely in the near term given that there appears to be a lower resistance band at the \$90 level.

We would switch to an overweight position only if the share price dips below \$88/share ...

Source: Y! Finance

Because of ESL's proclivity for using leverage to maximize investments, we expect that with Eddie Lampert at the helm, Sears Holding Corp. will make more frequent use of debt to finance the turnaround effort, which will become even more capital intensive now that Lampert must repair two wounded retailers with assets from the same balance sheet. Consequently, we used APV as our primary methodology for deriving a fundamental valuation. Applying an APV calculation to our pro forma financials for the combined companies provides us with a theoretical value of \$91.08.

Equity Research

Adjusted Present Value Calculations

Valuation Date: 11/19/2004
Trading Price (closing): 52.95

Cost of Equity Calculation:

Equity Risk Premium = 7% per Ibbotson Associates SBBI
 Risk-free rate = 4.115% (10-year Bond [UST4.25 11/15/14] at close 11/18/04)
 Beta = 1.48% (Sear's Adjusted Beta per Bloomberg)
 Equity Discount Rate R(e) = [Beta * RP] + R(f)
R(e) = 14.5%

Cost of Debt:

Cost of Debt K(d) = 7.168% (6.668 = yield on S6.25 05/01/09 on 11/18/04 + 1.5% penalty for K-Mart credit)
K(d) = 7.17%

Terminal Value Calculation:

Terminal Value = Final Cash Flow / (rate equity - growth)
 TV = CF Yr 2010/ (R(e) - g)
 TV = \$2518/ (14.5% - 2%)
TV = \$ 20,184

| Cash Flows | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | TV |
|--------------------------------|-------|-------|-------|-------|-------|-------|--------|

Total Theoretical Value = \$ 91.08

* We increase Kd in future periods to enumerate the impact that increasing the firm's leverage will have on the firm's perceived credit quality and hence on its cost of debt financing.

* The average maturity of S bonds is 2009 and this is company's second largest bond issue.

Equity Research

Financial Projections:

... we incorporated our beliefs for synergies that appear attainable from the merger when aggregating our results.

In preparing the pro forma financial statements which underlie this APV valuation, we separately analyzed Kmart and Sears and disparate going entities because, in the immediate future at least, Sears and Kmart remain very distinct operating agents. We believe that the most effective approach to valuing the combined company at the moment is to continue to approach the two divisions separately in terms of forecasting. Accordingly, we prepared pro forma forecasts for each retailer individually and then incorporated our beliefs for synergies that appear attainable from the merger when aggregating our results.

Underlying this comprehensive approach are our projections for the growth prospects of each company as stand-alone entities and the trajectories of Kmart and Sears. Here we highlight some key items:

Income Statement Items:

- For each company, we separately decomposed top-line revenue growth into: (1) geographic expansion (new stores); and (2) same store sales (SSS) growth (increased sales volume at existing stores).
 - Sears' new store growth is expected to remain slow in the short term. The company has issued guidance for flat same store sales for the rest of the year and we find this concerning. Until the company has demonstrated success toward transforming itself, we feel that it will continue to have difficulty boosting SSS and have used a low 1.5% growth rate in our forward-looking analysis.
 - We have the Sears' new store growth moving at a slightly faster 2.25% because of the company's recent efforts toward (and stated desire to continue) expanding into new free standing locations through building or acquisition.
 - Kmart has been shedding less profitable stores (including the sale of several to Sears last year); we have built into our analysis the expectation that they will continue this process, transferring stores to Sears' centers while slightly improving SSS growth by about 0.5% annually to reflect the survival effect of paring out weaker stores.
 - We are increasing the provision for un-collectibles as we believe that credit quality of the customer base will deteriorate as the spending power of the customer base

Equity Research

declines (per the analysis in our industry report, coupled with the possibility that Sears attempts to expand its financing unit to include Kmart customers).

- Sears' gross margins, which we calculate as a percentage of sales, have been improving as the company has done a good job improving its cost structure in recent years. We feel that both entities' margins will continue to improve slightly as the combined company enjoys lower COGS from increased buyer power associated with its new scale and through the realization of further operating efficiencies with Kmart's national distribution network. We project a 0.2% discount year-on-year in COGS over the 2005-2007 time period. Additionally, we project a 0.5% discount in SAG expenses over the same period.

Balance Sheet Items:

We have forecasted for the successor company to increase its use of debt financing as it attempts to construct a rather epic turnaround effort.

- We established a minimum portion of liquid assets to be retained as cash for operations. Excess cash flows are also retained in the company's cash balance, commensurate with its recent affinity for building up its cash coffers and a historical precedent of limited use of non-operating investments.
- We view inventories as an important de facto element of fixed assets for retailers and feel that inventory levels will be especially important for Kmart; we are treating Kmart's inventory as a fixed asset.
- We have forecasted for the successor company to increase its use of debt financing as it attempts to construct a rather epic turnaround effort. Because of ESL's proclivity for using leverage to maximize investments, we expect Sears Holding Corp. will make more frequent use of debt to finance the turnaround endeavor, which will become even more capital intensive now that Lampert must repair two wounded retailers with the same balance sheet. We have increased conventional debt and capital leases by 5% annually until 2009. We have also gradually adjusted the company's cost of debt (K_d) upward throughout the analysis to account for the increased return that fixed income investors will require as the company ramps up its leverage.
- We increase accounts payable to again enumerate our belief that the combined entity will enjoy greater buyer power and enjoy

Equity Research

some of the better financing terms for inventory currently being negotiated by Wal-Mart and Target.

- We base our CapEx requirements on an expected growth in square footage and base our forecast of the company's cost per square foot of new store space on recent transaction prices scaled upward to account for the company's shift toward opening free-standing stores where they will have to pay for certain amenities which are normally shared in mall space.

The \$81.23 base case scenario value represents where the merged company would trade should the planned synergies...somehow not materialize.

Base Case Scenario:

In order to compare our merger-based APV valuation with a non-merger based APV benchmark, we prepared a base case scenario for the combined entity (please refer to pages 23-25), stripping each operating company's income statement of any positive effects stemming from the merger. The result of the base-case analysis is an APV value of \$81.23, roughly \$10 below our theoretic price of \$91.08 which includes all of the synergies we expect the company to realize following the merger. The \$81.23 base case scenario value represents where the merged company would trade should the planned synergies associated with the merger somehow not materialize.

Equity Research

APV Calculations based on Base Case Scenario

Valuation Date: 11/19/2004
Trading Price (closing): 52.95

Cost of Equity Calculation:

Equity Risk Premium = 7% per Ibbotson Associates SBB
 Risk-free rate = 4.115% (10-year Bond [UST4.25 11/15/14] at close 11/18/04)
 Beta = 1.48% (Sear's Adjusted Beta per Bloomberg)
 Equity Discount Rate $R(e) = [Beta * RP] + R(f)$
 $R(e) = 14.5\%$

Cost of Debt:

Cost of Debt $K(d) = 7.168\%$ (6.668 = yield on S6.25 05/01/09 on 11/18/04 + 1.5% penalty for K-Mart credit)
 $K(d) = 7.17\%$

Terminal Value Calculation:

Terminal Value = Final Cash Flow / (rate equity - growth)
 $TV = CF \text{ Yr } 2010 / (R(e) - g)$
 $TV = \$2518 / (14.5\% - 2\%)$
 $TV = \$ 20,184$

| Cash Flows | 2004 | 2005 | 2006 | 2007 | 2008 | 2009 | TV |
|----------------------------------|-------|-------|-------|-------|-------|---------|--------|
| EBIT | 1,962 | 809 | 240 | (364) | (866) | (1,408) | |
| - Taxes (100% Equity Scenario) | 589 | 243 | 72 | (109) | (260) | (423) | |
| + Depreciation | 935 | 976 | 1,018 | 1,063 | 1,109 | 1,158 | |
| - Delta Working Cap Required | 100 | (314) | (360) | (409) | (368) | (330) | |
| - CapEx | 17 | 39 | 40 | 40 | 40 | 41 | |
| All Equity Cash Flows | 2,192 | 1,817 | 1,507 | 1,177 | 831 | 461 | 20,184 |
| Discount Factor ($r = 14.5\%$) | 1.00 | 0.87 | 0.76 | 0.67 | 0.58 | 0.51 | 0.51 |
| Discounted Value | 2,192 | 1,587 | 1,150 | 784 | 484 | 234 | 10,267 |

Total Discounted Value = \$ 16,699.46
Share Outstanding (mm) = 213
Theoretic Value Equity Cash Flows = \$ 78.40

Tax Shield:

Cash Flow from Tax Shield

| | | | | | | |
|----------------------------------|-------|-------|-------|-------|-------|-------|
| Tax Rate | 30.0% | 30.0% | 30.0% | 35.0% | 35.0% | 35.0% |
| D | 4,446 | 4,686 | 4,940 | 5,207 | 5,490 | 5,787 |
| Kd^* | 7.17% | 7.20% | 7.24% | 7.28% | 7.31% | 7.35% |
| CF(tax shield) | 96 | 101 | 107 | 133 | 140 | 149 |
| Discount Factor ($r = 5.67\%$) | 1.00 | 0.93 | 0.87 | 0.81 | 0.76 | 0.71 |
| Discounted Value | 96 | 95 | 93 | 108 | 107 | 105 |

Total Discounted Value = \$ 603.09
Share Outstanding (mm) = 213
Theoretic Value Equity Cash Flows = \$ 2.83

Total Theoretical Value = \$ 81.23

* We increase Kd in future periods to enumerate the impact that increasing the firm's leverage will have on the firm's perceived credit quality and hence on its cost of debt financing.

* The average maturity of S bonds is 2009 and this is company's second largest bond issue.

Equity Research

Sum-of-the-Parts Valuation:

Much has been made of the “break-up” value of Kmart and Sears’ assets. Many research reports discussing the company point to the value of its real assets as a rationale for holding the company.²⁷ We calculated the break-up value of the combined entity, assuming liquidation, at about \$70 per-share. We see this analysis as providing a good baseline for valuation—if the trading price drops below \$70, it makes sense for Eddie Lampert to break up the company. At the present, however, we do not see the company’s liquidation value exceeding its value as a going concern. The \$70 value we derive through the sum-of-the-parts valuation lies below our \$91.08 APV valuation (the firm’s value as a going concern) because the sum-of-the-parts method omits the combined firm’s cash flow going forward.

The \$70 value we derive through the sum-of-the-parts valuation lies below our \$91.08 APV valuation (the firm’s value as a going concern) ...

Break-Up/Sum-of-Parts Valuation

Sears' Assets:

| Real Estate | Square Footage | Price/Sq Ft | Value | Per Share |
|-------------|----------------|-------------|----------|-----------|
| | 92.7 | 48.60 | 4,505.22 | 19.55 |

| Brands | Sales (mm) | Op Inc (approx.) | Cap'd | Per Share |
|------------|------------|------------------|----------|-----------|
| Land's End | 2,000 | 192.00 | 1,808.76 | 7.85 |

²⁶ We want to clarify that we decided to use Kmart's share price as a proxy for Sears Holding Corp.'s share price and as the benchmark for our valuation. This decision is driven by the fact that Kmart is the entity that is taking over and that will remain the driver of the merged companies, even though the Kmart name will be dropped in favor of Sears Holding Corp.
